Is This The Best Strategy Game Ever?

Dwarven Fortress: Gold Edition is a small programming game. Gameplay focuses on strategic building, resource management, management of personnel, and micromanagement of the game players. Within each of these activities, or "tasks", the dwarf is in charge of deciding and implementing various scenarios. The tasks exist in logical sequence and when they are completed, new tasks are created. The tasks are played using the game's screen interface - in which the player can manipulate game objects, such as the rows of dwarves, and view graphs and maps, and make decisions about the state of the dwarven civilization, and see what would happen if various choices were made. A randomly generated map may be loaded into the game session; as the map begins to progress, opportunities for interaction with the game world, and in some cases, missions for the dwarven civilization, are designated.
