Serum carotenoids, tocopherols, and retinol in gestational diabetes mellitus and healthy pregnancy. Gestational diabetes mellitus (GDM) is associated with accelerated atherosclerosis and subsequent cardiovascular diseases (CVD). The aim of this study was to compare serum levels of carotenoids (including lutein, zeaxanthin, lycopene, alpha-carotene, beta-carotene), tocopherols (vitamin E), and retinol in women with and without GDM. Serum levels of carotenoids, tocopherols, and retinol were compared in 96 women with GDM, 96 women with a normal glucose tolerance (NGT) during pregnancy, and 96 healthy nonpregnant women (controls). In all study groups, significantly higher levels of lutein/zeaxanthin, alpha-carotene, and beta-carotene were found in GDM patients ca3bfb1094

There are two ways to import feedback into your drawings: You can import a file from the cloud using AutoCAD's Markup Import feature or you can use the Markup Assist feature to import a file into a drawing directly. Importing from the cloud: Print a.pdf or.txt file that's embedded with feedback and save it to a cloud location. From the Feedback tab in the Ribbon, select Markup Import. Navigate to the cloud folder that you saved the file to and select Open. Browse to the file. A document import assistant will appear and prompt you for a few additional information. An assistant will appear and prompt you for a few additional information. When prompted, answer a couple of questions and AutoCAD will import the file. Direct Import: If you want to import feedback directly, you can navigate to the location of the file that has feedback. Select File and click on Import Data. Markup Assist: Import a feedback document into a drawing by clicking on it. Select Markup Import from the Feedback tab in the Ribbon. Navigate to the file and click Open. A feedback document import assistant will appear and prompt you for a few additional information. Markup Assist will also ask you how you want to import the feedback document. Yes, show the drawing as it appears in the document and include any text annotations that are made in the document. No, include only the information that you're looking to import, and leave the original annotations intact. Customizing feedback You can now share your feedback via email, right from within a drawing. Start with the drawing. Select the Feedback tab in the Ribbon and select Show Email Preview. When prompted, select Print Preview. Select the 'Email' button on the right. If you have custom feedback, the email includes the feedback inline with the drawing. Drawing PDF and DGN Printing: Now you can draw directly to a PDF or DGN file. The Insert PDF/DGN command is now available. The Insert PDF command will open the drawing, display the current drawing area, and draw in the drawing. The drawing is created in the same way as a drawing opened via Draw command. Newly created drawings can be opened with the Command-P key combination. Supported Formats: AutoCAD 2023 supports drawing files
