CHAPTER 4 This chapter sets forth specification requirements for top running bridge cranes. It also includes requirements that apply to specified erection guides for top running bridge cranes. Optionally, a design is permitted to include the design release form and safety pads. If the design release and safety pads are included on the forms, then the required drawings shall be drawn by a qualified engineer. CHAPTER 5 This chapter sets forth specification requirements for a gantry type multiple girder electric overhead traveling (EOT) crane structure and hoist. This chapter also includes requirements that apply to a gantry type multiple girder single girder under running (GUR) crane. The crane and hoist design are described in the design manual. The purpose of this notice is to notify you of the following amendment to the CMAa Specification 70: Published in the January, 2015 issue of the CMAa published edition. The purpose of this amendment is to add Section 4.1 of the CMAa Specification for a few details concerning the compliance of CMAa Specification 70, as published in the June 2010 edition. The CMAa Specification at 70 Sub. 2.1.4 has been amended by the addition of as new subsections to revise the Conic column of Table 10 - One Trip Electrical Overhead Traveling Crane, to establish a revised 5/8" proximity to the pivot of the load connections within the hydraulic main body or body to the table. Table 10 - One Trip Electrical Overhead Traveling Crane, revised, now requires the compliance of one of the following: 1) a distance from the pivot of the load connections to the table being 5/8" or less (including from the pivot to the side edge of the table, where applicable); or, 2) a distance from the pivot to the center of the load connections being 5/8" or less (including from the pivot to the side edge of the table, where applicable).
